Posters

Posters are to be displayed for the entire conference in the Poster Exhibition. Authors are kindly requested to set up their poster on the corresponding board with the supplied material on Monday, 4th September before 10:00. Poster boards have the same number as the titles in the Conference Programme.

The poster session for **odd** numbers, e.g. P1, P3, P5 etc. will be held on Monday, 4th September from 16:30 to 18:30.

The poster session for **even** numbers, e.g. P2, P4, P6 etc. will be held on Thursday, 7th September from 15:00 to 17:00.

Poster presenters are kindly requested to be present during their poster sessions.

Poster boards are made from cork and their size is 980 mm x 1220 mm. The posters should not be laminated. Mounting materials will be provided on-site.

Best Poster Award

The Best Poster Award is sponsored by 55th EHPRG Meeting Organizing Committee. The Award presentation ceremony will be held during the Closing Ceremony. All Authors who would like to participate in the competition can get a sticker at the Registation Desk to mark their posters.

S 1 – High-pressure chemistry

P1
Modification of structure and physical properties of MgB_2 superconductor due to synthesis under 1 GPa pressure
Tomasz Cetner (Warsaw/Poland), Andrzej Morawski, Akiyasu Yamamoto, Ryszard Diduszko

P2
High-pressure synthesis, structure and equation of state of new tetragonal boron subnitride $B_{50}N_2$
Kirill Cherednichenko (Villetaneuse/France), Vladimir Solozhenko

P3
Topology of the chemical pressure field in simple molecules
Mikhail Pokryvaylo (Oviedo/Spain), Hussien Osman, Miguel Ángel Salvadó, J. Manuel Recio

P4
What can we learn from chemical pressure maps of metals and ionic crystals?
Alvaro Lobato (Madrid/Spain), Hussien Osman, Miguel Angel Salvado, Mercedes Taravillo Valentin Garcia Baonza, Jose Manuel Recio Muñiz

P5
Formation and behavior of metal hydrides at extreme p,T: In situ PXRD studies at ID06-LVP, ESRF
Kristina Spektor (Grenoble/France), Wilson Crichton, Ulrich Häussermann, Sumit Konar

P6
Experimental evidence for stable crystalline polymeric carbon dioxide at lowermost mantle conditions
Kamil Dziubek (Florence/Italy), Martin Ende, Demetrio Scelta, Roberto Bini, Mohamed Mezouar, Gaston Garbarino, Ronald Miletich

P7
Flexible amines – a new route for designing advanced, porous materials
Aleksandra Półrolniczak (Poznan/Poland), Szymon Sobczak, Andrzej Katrusiak

S 2 – New phenomena at high pressure

P8
Metallization of erbium and yttrium trihydrides under high pressure
Marek Tkacz (Warsaw/Poland), Mikhail Kuzovnikov, Mikhail Eremtes, Aleksander Drozdov, Stanislav Besedin

P9
Pressure-induced conformational conversion in p-tolyl disulfide at phase transition and in a hidden polymorph
Szymon Sobczak (Poznan/Poland), Andrzej Katrusiak

P10
Properties of $YbAu_2Si_2$ under hydrostatic pressure
Jiří Kaštil (Prague/Czech Republic), Kristina Vlášková, Jiří Prchal, Martin Míšek, Jiří Kamarád, Zdeněk Arnold

S 3 – Amorphous materials and liquids under pressure

P11
Hydrogen content and Raman spectra of amorphous magnesium silicates with Mg/Si from 0 to 0.9 hydrogenated at high pressure.
Vadim Efimchenko (Moscow/Russia), Nikolay Barkovskii, Vladimir Fedotov, Konstantin Meletov, Kirill Khryapin

S 4 – Elements and binary alloys under pressure: structural and electronic transformations

P12
Raman study of bismuth at high pressure
Julien Haines (Montpellier/France)

P13
Boron monosulfide: equation of state and pressure-induced phase transition
Kirill Cherednichenko (Villetaneuse/France), Ivan Kruglov, Artem Oganov, Yann Le Godec, Mohamed Mezouar, Vladimir Solozhenko

P14
Pressure induced elimination of ferro-ferro transition in $Sc_{0.35}Ti_{0.65}Fe_2$ intermetallic compound
Zdenek Arnold (Prague/Chech Republic), Martin Misek, Olivier Isnard, J. Pemeja, Jiri Kastil, Jiri Kamarad

P15
High pressure phase diagram of sulphur from laser-heated diamond anvil cell experiments
Hannah B. Scott (Edinburgh/Great Britain), Tomoaki Kimura, R. Stewart McWilliams

S 5 – Materials chemistry at high pressure

P16
Synthesis by sol gel route, structural and dielectric characterization of cerium doped lead zirconium titanate
El Miloudi El Moussafir (Casablanca/Maroko)

P17
Phosphorus doping in (111) face of single crystal diamond grown by the temperature gradient HPHT method
Sergei Buga (Moscow/Russia), Vitaly Bormashov, Jullien Bargon, Michail Kuzntetsov, Sergei Terentiev, Sergei Tarelkin, S Temgoua, Vladimir Blank

P18
Post-spinel transition in hausmannite determined by high P-T in situ X-ray diffraction
Jolanta Darul (Poznan,Poland), Christian Lathe, Pawel Piszora

P19
Crystal packing diversity of the simple amidinate oxozinc complex derived by non-covalent interactions
Michał Terlecki (Warsaw/Poland), Michał Leszczyński, Szymon Sobczak, Iwona Justyniak, Andrzej Katrusiak, Janusz Lewiński

P20
Dimerization in the III-V semiconductor gallium phosphide

Barbara Lavina (Las Vegas, USA)

P21
High pressure magnetic characterisation of the elpasolite La_2NiMnO_6
Christopher Ridley (Didcot/Great Britain), Nicholas Funnell, Craig Bull

P23
Pressure-induced broadening of photoluminescence from Bismuth-doped glasses
John Proctor (Salford/Great Britain), Robert McMaster, Malik Hakeem, Mark Hughes

S 6 – Superconductivity under high pressure: Experiment and theory

P24
Development of a symmetric miniature diamond anvil cell for magnetic measurements in a SQUID magnetometer and structural studies.
Bastien Guigue (Paris/France)

P25
Pressure – induced metallization and superconductivity in the transition metal dichalcognides MX_2
Moaz ElGhazali (Dresden/Germany)

P26
Strong electron-phonon and band structure effects in the optical properties of superconducting hydrogen
Miguel Borinaga (Donostia-San Sebastian/Spain), Julen Ibañez-Azpiroz, Aitor Bergara, Ion Errea

P27
Formation process of high-Tc phase of sulfur hydride
Mari Einaga (Toyonaka,Japan), Masafumi Sakata, Akiyoshi Masuda, Harushige Nakao, Katsuya Shimizu, Alexander Drozdev, Mikhail Eremets, Saori Kwaguchi, Naohisa Hirao, Yasuo Ohishi

S 7 – Critical and supercritical fluids under pressure

P28
High pressure processing for the pharmaceutical compounds using the supercritical fluid technology
Yan-Ping Chen (Taipei/Taiwan), Chun-Hao Fang, Chun-Ta Chen, Muoi Tang, Sheau-Ling Ho

P29
High pressure synthesis of a temperature and pH-sensitive copolymer using the supercritical fluid technology
Muoi Tang (Taipei/Taiwan), Sheau-Ling Ho, Yan-Ping Chen

S 8 – High pressure structural analysis and (meta)data deposition

P30
DAC-XRD: Data management and processing framework for high-pressure X-ray diffraction experiments with diamond anvil cells
Anna Makal (Warsaw/Poland), Jaroslaw Kalinowski

P31
Synthesis, characterization, crystal structure determination and theoretical study of some new rhenium(I)-tricarbonyl complexes with 2,2'-bipyridine and 2,9-dimethylphenanthroline ligands
Fatemeh Safari (Tehran,Iran)

S 9 – High-pressure instrumentation

P32
Electric discharge machine for drilling diamond anvil cell gasket holes
John Proctor (Salford/Great Britain), Daniel Massey, Stuart Astin

S 10 – **New techniques at large scale facilities**

P33
Melting dynamics of water ices in the mesoscopic regime
Naomi Falsini (Florence/Italy), Margherita Citroni, Samuele Fanetti, Paolo Foggi, Roberto Bini

S 11 – Porous framework under pressure

P34
Three polymorphous crystals with large channel network studied by SXRD
Tamás Holczbauer (Budapest/Hungary), Dániel Vajk Horváth, Petra Bombicz, Tibor Soós

S 12 – High pressure crystallographic studies

P35
High-pressure study of the crystal structure of disodium 2-amino-6-oxo-6,7-dihydro-1H-purine-1,7-diide heptahydrate
Anna Gaydamaka (Novosibirsk, Russia), Sergey Arkhipov, Boris Zakharov, Yuriy Seryotkin, Elena Boldyreva

P36
Compressed interactions and properties of methylamines
Marcin Podsiadło (Poznan/Poland), Anna Olejniczak, Andrzej Katrusiak

P37
Pressure dependence of an unusual structural transition in a molecular Spin-CrossOver compound revealed by Powder X-ray Diffraction under pressure
Elodie Tailleur (Bordeaux/France), Mathieu Marchivie, Jean-Paul Itie, Philippe Guionneau

P38
High-pressure structures of meta-dichlorobenzene and dibromobenzen
Karolina Kwaśna (Poznan/Poland), Michalina Anioła, Weizhao Cai, Andrzej Katrusiak

P39
High-pressure preference for the low Z' polymorph of a molecular crystal
Kinga Roszak (Poznan/Poland), Anna Katrusiak, Andrzej Katrusiak

P40
Giant anomalous strain between high-pressure phases and the mesomers of urea
Kinga Roszak (Poznan/Poland), Andrzej Katrusiak

P41
Pressure effect on the complication of crystal structures the case study on 6-chloro-4,4,5,7-tetramethyldihydrocoumarin
Ida Bukalska (Poznan/Poland), Kacper Rajewski, Andrzej Katrusiak

P42
High-pressure polymorphism of 4,4'-bipyridine perchlorate
Michalina Anioła (Poznan/Poland), Andrzej Katrusiak

P43
Disappearing polymorphs of 2,4,5-triiodoimidazole
Kacper Wojciech Rajewski (Poznan/Poland), Michał Andrzejewski, Andrzej Katrusiak

P44
High pressure studies of 4,5 – dichloroimidazole
Karolina Fercz (Poznan/Poland), Kacper Rajewski, Andrzej Katrusiak

P45
Solvent-effect for the stability and compression of a noncovalent porous material WUT-Ni
Karolina Fercz (Poznan/Poland), Kacper Rajewski, Katarzyna Sołtys, Andrzej Katrusiak

P46
Pressure effect on the arene-perfluoroarene interaction
Alexandra Friedrich (Wuerzburg/Germany), Krzysztof Radacki, Javier Ruiz-Fuertes, Ines E. Collings, Daniel Sieh, Todd B. Marder

P47
Halogen and hydrogen bonds in compressed pentachloroethane

Marcin Podsiadło (Poznan/Poland), Maciej Bujak, Andrzej Katrusiak

P48
High pressure behavior of $[Co(NH_3)_5NO_2]Br_2$ as a member of photosalient cobalt(III)
Boris Zakharov (Novosibirsk/Russia), A.S. Marchuk, Elena Boldyreva

S 13 – Synchrotrons and neutron high-pressure facilities

P49
Opportunities for high-pressure science at the European Spallation Source
Malcolm Guthrie (Lund/Sweden), Arno Hiess

P50
Towards resonant X-ray scattering at high pressure: strategy and first results
Isabel Povedano (Edinburgh/Great Britain), Daniel Porter, Konstantin Kamenev, Alessandro Bombardi

S 14 – Pressure induced quantum criticality and novel emergent phases

P51
Magnetism of $U_4Ru_7Ge_6$ under high pressures
Martin Míšek (Prague/Czech Republic), Jan Prokleška, Michal Vališka, Petr Proschek, Jaroslav Valenta, Jiří Kaštil, Jiří Kamarád, Martin Diviš, Vladimír Sechovský

S 15 – High-pressure spectroscopy and structural studies of new materials

P52
Aniline-derived arrays polymerized at high-pressure and high-temperature
Marcelo Nobrega (São Paulo/Brazil), Erico Teixeira-Neto, Andrew Cairns, Marcia Temperini, Roberto Bini

P53
High-pressure structural and optical properties of organometal halide perovskites
Kai Wang (Changchun/China)

P54
Unusual structural transition in $CaCo_3V_4O_{12}$ double perovskite under high pressure
Sergey Ovsyannikov (Bayreuth/Germany)

P55
High-pressure phase of scintillating cadmium tungstate
Daniel Errandonea (Valencia/Spain) Javier Ruiz-Fuertes, A. Friedrich, A. Segura, W. Morgenroth, P. Rodriguez-Hernandez, A. Muñoz, Y. Meng

P56
Stability of the benzene molecule to above 50 GPa at 300 K
John Proctor (Salford/Great Britain), Saba Shaikh, Francis Barber, Malik Hakeem

P57
Kevlar® fibres under hydrostatic pressure by means of Raman spectroscopy
Dimitris Christofilos (Thessaloniki/Greece)

P58
High pressure Raman and photoluminescence studies of InxAl1-xN alloys
Dimitris Christofilos (Thessaloniki/Greece)

P59
The possibility of new multiple calcium polyhydride structural phases synthesized under high pressure and high temperature
Takaki Muramatsu (Bristol/Great Britain), Muhtar Ahart, Maddury Somayazulu, Russell Hemley

P60
Ab initio theoretical study of rare-earth orthophosphates APO_4 (with A=La, Sc, and Y) under pressure
Andres Mujica (La Laguna/Spain), Silvana Radescu, Javier Lopez-Solano, Placida Rodriguez-Hernandez, Alfonso Muñoz

S 16 – Theoretical prediction of high-pressure phases

P61
Dynamical and elastic properties of $MgSO_4$ under high pressure from ab initio simulations
Alejandro Jorge-Montero (La Laguna/Spain), Plácida Rodríguez-Hernández, Alfonso Muñoz

P62
Structural and electronic properties of WX_2 dichalcogenides at high pressure
Oto Kohulák (Bratislava/Slovakia), Roman Martoňák

P63
Structural evolution of amorphous polymeric nitrogen from ab initio simulations
Dominika Vlčková (Bratislava/Slovakia), Oto Kohulák, Dušan Plašienka, Roman Martoňák

S 17 – Shock experiments and ultra-high pressure generation

P64
Diffraction studies of phase transitions and strength in vanadium
Michael Stevenson (Edinburgh/Great Britain)

S 18 – High-pressure life and biosciences

P65
A radiant GRIN at high pressure: Utilizing gradient index lenses to enable multiphoton microscopy at hydrostatic pressure up to 200 MPa
Dominik Schneidereit (Erlangen/Geramany)

P66
Comparative study of structural and activity changes of HIV-1 protease and its covalently linked dimer under high pressure
Marek Ingr (Zlín/Czech Republic), Laetitia Palmade, Taťána Majerová, Dominique Chevalier-Lucia, Eva Kutálková, Josef Hrnčiřík, Reinhard Lange

P67
Macromolecular crowding and pressure: crowding agents destabilize proteins in low concentration, but stabilize them in high concentration against pressure unfolding
László Smeller (Budapest/Hungary), Zsofia Török, Frederik Pfalzgraf, Judit Somkuti

S 20 – High-pressure studies in the Earth & planetary sciences

P68
Ab initio study of the high pressure phase of the CO_2 clathrate hydrate
J. Manuel Recio (Oviedo/Spain), Fernando Izquierdo-Ruiz, Olga Prieto-Ballesteros

P69
Spectroscopic properties of natural jarosite under high pressure
Alvaro Lobato (Madrid/Spain), Miriam Peña-Alvarez, Ana Isabel Casado, Valentin Garcia Baonza, Mercedes Taravillo

P70
Single crystal x-ray diffraction of forsterite III to 160 GPa
Barbara Lavina (Las Veegas/USA), Sally Lee, Minta C Akin, Paul D Asimow, M. Homel, RS Crum, D Pagan, J Lind, Joel V bernier, JL Mosenfelder, AM Dillman, OV Fat'Yanov, MG Newman

S 22 – Food science and technology

P71
Potential of high pressure technology to inactivation of Lactobacillus brevis in beer
Justyna Nasiłowska (Warsaw/Poland), Barbara Sokołowska, Marzena Woszczyk, Dorota Michałowska, Adrianna Raczkowska

P72
Optimization of high hydrostatic pressure extraction by response surface methodology of bioactive compounds from stinging nettle

Jorge Saraiva (Aveiro/Portugal), Silvia Moreira, Elisabete Alexandre, Manuela Pintado

P73
Brewing characteristics of piezosensitive Sake – yeasts
Kazuki Nomura (Niigata/Japan), Hirofumi Hoshino, Kazuaki Igoshi, Haruka Onozuka, Mayumi Hayashi, Harutake Yamazaki, Hiroaki Takaku, Akinori Iguchi, Toru Shigematsu

P74
A pilot study of combinations of ultrasonication pre-treatment and high pressure processing effecting microbial inactivation and rheological attributes of liquid egg yolk
Adrienn Tóth (Budapest/Hungary), Csaba Németh, Rebeka Csáti, Réka Juhász, Barbara Csehi, László Friedrich

P75
High Pressure Processing of baby foods: inactivation of Saccharomyces cerevisiae and evaluation of sensory atributes in fruits base product for babies and infants during long shelflife
Bozena Mazurkiewicz (Warsaw/Poland)

S 23 – Energy materials under high pressure: experiment and theory

P76
Combined theoretical and experimental investigations of pressure-driven phase transition in $InNbO_4$
Alfonso Munoz (La Laguna/Spain), Placida Rodríguez-Hernandez, Daniel Errandonea, Alka B Garg, Catalin Popescu, Domingo Martinez-Garcia, Juan A Sans, Vanesa Cuenca-Gotor, Pablo Botella

P77
Structural and vibrational study of monoclinic As_2S_3 at high pressure.
Vanesa Paula Cuenca-Gotor (València/Spain), Juan Ángel Sans, Francisco Javier Manjón, Catalin Popescu, Silvana Radescu, Andrés Mujica, Plácida Rodríguez-Hernández, Alfonso Muñoz, Jordi Ibáñez

P78
The effect of pressure on hydrogen solubility in Zircaloy nuclear fuel cladding
John Proctor (Salford/Great Britain), Hannah Weekes, Dean Smith, Cristina Simionescu, Timothy Prior, Mark Wenman, David Dye

P79
High-pressure studies of high-nitrogen-content 6-azido-1,2,3,4-tetrazolo-[1,5-b]-pyridazine
Anna Olejniczak (Poznan/Poland), Anna Katrusiak, Andrzej Katrusiak

P80
Vibrational study of In_2Se_3 under high pressure

Rosario Vilaplana (València/Spain), Samuel Gallego, Alfonso Muñoz, Plácida Rodríguez-Hernández, Francisco Javier Manjón, Alfredo Segura, Daniel Errandonea

P81
Effect of pressure on $Li_{0.5}Ni_{0.5}Mn_2O_4$: New quaternary mixed metal oxide – bridging the gap between $LiMn_2O_4$ and $NiMn_2O_4$
Paweł Piszora (Poznań/Poland), Jolanta Darul, Dörthe Haase

S 24 – **Physics and transformations in compressed matter**

P82
A modified system for low temperature experiments in a 3000 ton multi-anvil press
Rick Secco (London/Canada), Wenjun Yong

S 26 – Novel magnetic-electronic behavior at extreme P-T

P83
Pressure effect on metamagnetic transition in $UIrSi_3$
Jaroslav Valenta (Prague/Czech Republic), Fuminori Honda, Jiří Kaštil, Jiří Prchal, Vladimír Sechovský

P84
High-pressure effect on magnetism and valence of $YbPd_2Si_2$
Jiří Prchal (Prague/Czech Republic), Jan Fikáček, Jan Prokleška, JIří Kaštil, Kristina Vlášková, Marie Kratochvílová, Martin Diviš

S 27 – Structural phase transitions theory and experiment

P85
Bonding indicators for the analysis of pressure-induced structural phase transitions
Olga Matthies (Dresden/Germany), Yuri Grin, Miroslav Kohout

S 28 – High pressure mineral physics and geochemistry

P86
Densification of calcium-aluminum-silicate glass at the pressure of ~5.5 GPa
Ayano Nakajima (Sendai/Japan), Tatsuya Sakamaki, Naoki Hisano, Yoshiki Horioka, Tomonori Ohashi, Akio Suzuki

P87
Electrical resistivity of Fe, Co and Ni along their melting boundaries
Rick Secco (London/Canada), Reynold Silber, Innocent Ezenwa, Wenjun Yong, Joshua Littleton

P88

Thermodynamic properties of (Mg,Fe)-silicates at mantle conditions and geophysical implications
Tatiana Sokolova (Irkutsk/Russia), Peter Dorogokupets

P89
High pressure behaviour of kalsilite-O1
Clivia Hejny (Innsbruck/Austria), Biljana Krüger

P90
X-ray diffraction study of rhodium oxyhydroxide at high pressure
Akio Suzuki (Sendai/Japan), Yoshiki Horioka, Naoki Hisano

P91
Decomposition of fayalite at high hydrogen pressure
Vadim Efimchenko (Moscow/Russia), Nikolay Barkovskii, Vladimir Fedotov, Konstantin Meletov, Aleksandra Bendeliani
